Mantenimiento

Cleaning should be carried out using a soft sponge, soap and water. After cleaning, the shower tray should be dried so as to prevent limescale forming. No abrasive products, solvents or objects that could damage the surface should be used. Should the shower tray surface be scratched accidentally, it should be enough just to go over the surface with a solvent-free polish. If necessary, the scratch can first be wet-sanded with 800 G wet-and-dry sandpaper, then wet-sanded with 1200 G paper, before finally applying the polish.
